FIRE STATION

AN UPDATE ON RESCHEDULING:

Explore the historic administrative shift moving state-licensed medical cannabis and FDA-approved products from Schedule I to Schedule III under federal law. This article breaks down immediate benefits like tax relief and patient protections, while outlining what to expect as the DEA prepares its final ruling on adult-use cannabis later this year.

CAMPFIRE COMPANIONS:

Whether you are winding down by the fire pit or kicking off a crisp fall weekend, this collection blends time-tested favorites with the season's freshest drops. From soothing Indica flower to cozy, slow-acting edibles, these go-to picks are tailored for cool autumn afternoons and starlit nights alike.

CAMPFIRE & CANNABIS - U.P. TRAVEL GUIDE:

Planning an autumn escape into Upper Michigan's wilderness? Use this regional guide to match top local campsites with your favorite Fire Station shop, ensuring your fall getaway is seamlessly stocked and elevated.

COOKING WITH CANNABIS BY GELATO:

Bring warmth to cool fall nights with a creamy, rich Alfredo sauce elevated by Gelato Infused Drizzle. This simple step-by-step recipe shows you how to seamlessly dose your favorite pasta dish to your exact preference.

THE FIRE STATION SCHOLARSHIP:

Meet recent LSSU Cannabis Chemistry graduate Tiffany Miller-Schroden and NMU Medicinal Plant Chemistry student Darcy Mickelsen, two local TFS scholarship recipients blazing trails in the field. Discover how these passionate scholars are advancing research, safety, and innovation to shape an ethical future for the industry.

AN UPDATE ON RESCHEDULING

A historic administrative shift is underway to move marijuana from Schedule I of the Controlled Substances Act (CSA) — a category reserved for drugs with a high potential for abuse and no accepted medical value — to Schedule III.

In late April 2026, the U.S. Department of Justice (DOJ) and Drug Enforcement Administration (DEA) issued a landmark order officially placing two categories of cannabis into Schedule III of the CSA:

- 1. FDA-approved marijuana products
- 2. Medical marijuana lawfully manufactured, distributed, or dispensed under a state-issued medical license

This order marked the first time in over 50 years that federal law officially recognized the medical utility and lower abuse potential of cannabis.

What Changed Immediately for Medical Operations

Tax Relief Under Section 280E: Because Internal Revenue Code Section 280E applies only to Schedule I and II substances, state-licensed medical cannabis operators were immediately freed from the tax burden that previously prevented them from writing off ordinary business expenses.

Expedited DEA Pathway: The DOJ established a fast-track allowing state-licensed medical operators to apply for federal DEA registrations, deferring heavily to existing state licensing frameworks.

New Protections for Patients: With medical cannabis recognized as a Schedule III substance, legal experts note that patients may now have broader employment protections under the Americans with Disabilities Act regarding non-impairing medical use.

Following the federal rescheduling of medical cannabis, The Fire Station transitioned to focus exclusively on adult-use (recreational) cannabis on June 26, 2026.

What Was Left Out

Recreational / Adult-Use Cannabis: The April order specifically applied to state-licensed medical cannabis. Recreational adult-use cannabis remained classified under Schedule I pending further administrative proceedings.

What's Happening Now

To address the broader question of whether all cannabis should be reclassified to Schedule III, the DEA initiated a formal administrative hearing process.

From June 29 - July 15, 2026, an Administrative Law Judge presided over evidence and testimony from invited stakeholders, including law enforcement agencies, health officials, and industry opponents, focused on abuse liability and public health concerns. In place of oral closing arguments, the judge instructed participating parties to submit formal post-hearing briefs and proposed findings by August 17, 2026.

What's Next?

Now that post-hearing briefs are submitted, the judge will review the complete evidentiary record and draft an official recommendation.

Once the recommendation is submitted to the DEA Administrator, the agency will prepare its final ruling on whether to extend Schedule III status to all forms of cannabis — a decision that's expected by the end of 2026.

CANNABIS & FIREARMS: PROGRESS IN THE COURTS

Cannabis has undergone historic shifts in its progress towards legalization, but there is one area that has not seen much momentum until recently: gun ownership. In a landmark decision, the Supreme Court ruled favorably for Ali Danial Hemani when his firearm ownership was called into question after drugs were found at his home while executing a search warrant. While the case does not openly allow cannabis users to possess firearms, it does create a higher standard to disarm citizens based purely on cannabis consumption.

The decision was issued on June 18, 2026, with the Supreme Court ruling unanimously. They struck down the federal government's attempt to disarm regular marijuana users under 18 U.S.C. § 922(g)(3) as unconstitutional under the Second Amendment.

Written by Justice Neil Gorsuch, the opinion invalidates the broad application of the federal "unlawful user" provision, which historically made it a felony punishable by up to 15 years in prison.

Case Background

The case stems from an August 2022 search of Ali Danial Hemani's home in Texas. Federal agents found a handgun stored in a closet, along with small amounts of marijuana and cocaine. Hemani admitted to using marijuana regularly (several times a week).

A grand jury subsequently indicted Hemani under a federal law that makes it illegal for anyone who is "an unlawful user or addicted to any controlled substance" to possess a firearm. Crucially, the prosecution did not allege that Hemani was intoxicated at the time he possessed the gun, nor that he had committed any violent crime or threatened anyone. Instead, the government argued that his status as a habitual user of a controlled substance was enough to automatically strip him of his Second Amendment rights.

The Court's Ruling & Legal Reasoning

Applying the historical framework established in *New York State Rifle & Pistol Ass'n v. Bruen* (2022), the Court evaluated whether the federal law aligned with America's historical tradition of firearm regulation.

The government attempted to justify § 922(g)(3) by comparing it to 18th- and 19th-century laws targeting "habitual drunkards." However, the Court rejected this analogy, highlighting major flaws in the government's argument:

- **Mismatch in Purpose:** Historical drunkard and vagrancy laws aimed to address public idleness or financial ruin, not a presumption of inherent violence. Justice Gorsuch stated in the opinion, "Instead, those laws focused on habitual drunkards because their drinking rendered them practically incapacitated and incapable of managing their affairs."
- **Lack of Imminent Danger:** Founding-father era restrictions focused on present intoxication or active, demonstrated danger — not status-based bans triggered by off-duty or past drug use.
- **Government Inconsistency:** Justice Gorsuch pointed out that federal posture toward state-level marijuana legalization severely undercut the claim that all drug users are categorically dangerous threats to public safety. In his opinion he states "...after we heard oral argument[s], the government moved some marijuana products to Schedule III."

Significance & Impact

The Hemani decision marks a landmark shift at the intersection of gun rights and federal drug policy:

1. **Impact on Cannabis Owners:** Millions of legal state-level cannabis users who own guns for self-defense are no longer subject to automatic federal felony prosecution under § 922(g)(3) based solely on status. This does not create a federal carve-out that legalizes cannabis or legalizes using cannabis and firearms together.
2. **Narrower Federal Scope:** Congress may still draft narrower laws targeting individuals who carry firearms while actively impaired or who pose specific, evidence-backed threats of violence, but status-based blanket bans are off the table.
3. **Pressure on Drug Laws:** The ruling puts increased pressure on federal lawmakers to resolve the contradiction between federal drug schedules and widespread state-level legalization.

While there are still outstanding questions around firearm ownership and cannabis, this is an important step forward for protecting the Second Amendment rights of cannabis users. The decision shows that even though cannabis faces more legal battles in the path to full legalization, progress is being made.

Brand Spotlight: Flower of Life

Rooted in Flint, Michigan, Flower of Life is a small, family-owned craft cannabis brand bringing a true caregiver mentality to the commercial market. Built around intentional living soil practices, unique genetics, and a deep respect for the plant, Flower of Life creates cannabis meant to be appreciated for its full expression rather than just a number on a lab test.

The Cultivation Philosophy: Intention Meets Living Soil

Flower of Life believes that exceptional flower starts beneath the surface. Rather than pushing plants for maximum yield or inflated THC numbers, their living soil methodology prioritizes a biologically active root zone to let each strain express its full natural character. They cultivate using beneficial mycorrhizae fungi that expand root networks for better nutrient uptake, alongside house-brewed, fermented organic worm casting teas that nourish the soil microbiology.

Inspired by Masaru Emoto's philosophy on water and environmental intention, water vortex tanks are paired with healing crystals to reflect their core belief that care and purpose matter at every stage. Post-harvest, the flower undergoes a slow cold curing process held strictly at approximately 60°F and 60% relative humidity to preserve delicate terpenes, moisture, and aroma.

Award-Winning Genetics & Full-Spectrum Options

Genetics are central to the brand's identity. Flower of Life continuously pheno-hunts proprietary genetics while partnering with legendary breeders like Tiki Madman and Fresh Coast. They hold a special passion for legacy strains, expressive sativas, and high-CBD, balanced 1:1 options. Their flagship Purple Haze—a Flower of Life Genetics exclusive delivering a bright citrus, sweet grape, and floral haze profile—earned 1st Place in Sativa Flower at the 2026 Best in Grass Michigan competition after taking 3rd Place in 2025. Other fan-favorite strains include Sacred G, Tropicana Cookies BX, Singapore Sling, GMO Zkittlez, Runtz Jelly, and Peach Goblin. Offerings span the full cannabinoid spectrum, ranging intentionally from high-potency flower testing in the mid-30% THC range down to balanced 5% THC, high-CBD options designed for approachable sessions or custom blending.

Packaging Built to Protect the Craft

To ensure the care put into cultivation reaches the consumer, Flower of Life packages its loose flower in Italian-made Miron Violet Glass Jars. This specialized glass blocks harmful light degradation while allowing beneficial UV and infrared spectra to pass through. Every jar includes a 58% humidity pack to lock in optimal freshness, terpene aroma, and moisture from seed to shelf. In addition to loose flower jars, their lineup includes full-flower 1g pre-rolls and 5-packs of 0.5g pre-rolls.

Smoke with Intention

Cannabis isn't a race to the highest THC percentage, it's about finding the right strain for the right experience. Whether you are seeking award-winning sativas or rich CBD profiles, Flower of Life delivers intentional, purpose-driven cannabis.

Explore their strain library and find products near you at mifloweroflife.com.

Cozy Cannabis Crossword

Across

5. A mix of Indica and Sativa
6. Number of Fire Station locations across the U.P.
7. A proud resident of Michigan's Upper Peninsula
11. Essential plaid layer for any U.P. trip
12. Infused brownie, gummy, or beverage
13. Home of The Fire Station's first location

🔥 CAMPFIRE COMPANIONS 🔥

Wyld WYLD KIVI

Feel good. Have fun. Get 'er done. The Wyld Kiwi Sativa gummy lights a fire of focused energy with a unique 1-to-1 blend of THC and THCV. Whether you're choring, exercising or socializing, THCV is known to bring mental sharpness (and less snackiness) to the typical Sativa high. Crafted with the bright, tropical vibes of real kiwi fruit.

Pure Clouds LSD 14G MIRON JAR

LSD is a five-time award-winning sativa known for its intensely euphoric and cerebral effects. Expect a powerful, psychedelic experience that delivers an uplifting rush followed by a deeply immersive stone. Its distinctive profile combines a musky aroma with bold earthy notes and a bright burst of lemon, creating a complex flavor that lingers long after the exhale.

The Fire Station CAMO HOODIE

Back by popular demand, our Fire Station duck camo hoodie features a thick, premium build updated with a classic TFS logo. It's the ultimate cozy go-to as the weather turns cold.

Glacier EIGHTHS

Small-batch indoor flower grown in Michigan. Every nug is hand-trimmed and never remediated.

Flower of Life OUNCE JARS

Top-tier flower packaged in Miron violet glass for optimal preservation. Reserved for special cuts and small releases. A true jar experience for connoisseurs.

Detroit Edible Company BARRACUDA LIVE ROSIN MILK CHOCOLATE BAR

The iconic Barracuda THC Milk Chocolate bar, now infused with live rosin. Experience the potent, full-spectrum effects of live rosin, expertly infused in deliciously smooth, rich 65% Belgian milk chocolate.

Trinity PACZKI LIVE HASH ROSIN GUMMIES

Big flavor. 100% live hash rosin. 200mg of solventless goodness in every Paczki gummie—with 4 craveable flavors to choose from.

Oceana OCEANA

Premium outdoor prepacked flower ounces proudly grown 43°N, 86°W, Hesperia, MI since 2021 with California genetics.

Gelato FIRST BITE COCO CLODS CEREAL BITES

"Cannabis Infused Mini Cereal Balls"
20mg THC ea.
10 Pieces per bag
200mg THC per bag
3 Flavors: Cinna Clusta's, Funky Pebbles, and Coco Clods.

All Star Brands MR. VAPOR 3G DISPOSABLE

Mr. Vapor Soar is built on proven vape hardware. Drawing from the engineering legacy of the Mr. Vapor Nicotine brand, Mr. Vapor Soar brings performance-first design to cannabis. Every device is engineered to deliver smooth airflow, consistent activation, and reliable output.

Party Favors INFUSED BONFIRE PRE-ROLLS

The Bonfire Infused Pre-Roll is built for big vibes and shared moments. Packed with 1.25 grams of premium infused cannabis, this heavy-hitter is designed to be sparked, passed, and remembered.

Good Tide GOOD TIDE GRAPEFRUIT

Good Tide Grapefruit gummies have an irrepressibly sunny disposition. Mood-boosting CBC plays nicely with CBD and our fresh-pressed Sativa rosin, making for a true-to-plant experience that'll take your mind to warmer latitudes—anytime, anywhere.

COOKING WITH CANNABIS

GELATO DRIZZLE ALFREDO SAUCE

Disclaimer: Consumers shall select a tincture or concentrate that is compatible with their consumption preferences. TFS shall not be held liable for any claims, damages, or consequences arising from the consumer's misuse of the recipe instructions, any alterations or deviations from the provided instructions, or the improper use, overconsumption, or miscalculation of THC or THC-infused ingredients.

INGREDIENTS:

- ½ cup butter
- 8 oz cream cheese
- 2 tsp garlic powder
- 2 cups milk
- 6 oz grated Parmesan cheese
- ⅓ tsp black pepper
- Gelato Infused Drizzle, dosed to preference. 1/3 teaspoon = 10mg THC.

INSTRUCTIONS:

Melt & Mix

Melt butter in a saucepan over medium heat. Add cream cheese and garlic powder. Whisk until smooth.

Make It Creamy

Slowly add milk, whisking as you go. Stir in Parmesan and black pepper until the sauce is smooth and creamy.

Remove From Heat

Once the sauce reaches your desired consistency, remove it from the heat.

Add Your Infused Drizzle

Stir in your desired amount of Gelato Infused Drizzle until evenly combined.

Serve & Savor

Toss with your favorite pasta and enjoy!

DOSE IT YOUR WAY

1/3 teaspoon = 10mg THC

Measure based on your preferred dose and mix thoroughly for even distribution.

For best results: Add the infused drizzle after cooking. You can also drizzle directly over your finished dish. Do not cook over 400°F or for longer than 5 minutes after adding.

The Fire Station Scholarships

At The Fire Station, we believe that supporting the next generation of cannabis professionals is key to building a safe, ethical, and innovative industry. That's why we are incredibly proud to introduce our latest scholarship recipients, Tiffany Miller-Schroden, a recent graduate from Lake Superior State University (LSSU), and Darcy Mickelsen, a Northern Michigan University (NMU) Medicinal Plant Chemistry student graduating in 2027.

MEET TIFFANY MILLER-SCHRODEN

Tiffany graduated in May with a degree in Cannabis Chemistry from LSSU. Her journey from a curious first-generation student to a confident chemist is nothing short of inspiring. We sat down with her to discuss her roots, her hurdles, and her hopes for the future of the plant.

Navigating higher education is a challenge for anyone, but as a first-generation college student, Tiffany had to build her own roadmap.

"I initially had no idea what college would be like academically—from navigating classes and professors to understanding lab work," Miller-Schroden said.

After transferring to LSSU, she found her stride in their close-knit community. By joining the Cannabis Club, she gained the hands-on experience and networking opportunities that defined her senior year. For Tiffany, "doing college" wasn't just about the books; it was about finding the balance between rigorous lab work and the social growth that shaped her identity.

When it comes to her career, Tiffany is keeping her options wide open. Whether it is extraction, formulation, research, or testing, she is ready to dive into any opportunity the industry offers. Her ultimate mission?

"I hope to make the cannabis industry safe, ethical, and accessible," Miller-Schroden said.

Her long-term sights are set on the mountains, where she hopes to balance her professional passion with a healthy, outdoor lifestyle.

Advice for future students:

To those considering a similar path, especially fellow first-generation students, Tiffany has some advice: "Just do it!"

"The cannabis industry needs educated, passionate individuals. Your knowledge and dedication are essential to creating a safe and ethical future for this growing field," Miller-Schroden said.

MEET DARCY MICKELSEN

Darcy's drive to merge rigorous analytical chemistry with commercial cosmetic R&D is a perfect example of how the cannabis industry is evolving. By funding scholarships at local institutions like NMU, home to the country's first four-year degree program in Medicinal Plant Chemistry, The Fire Station hopes to foster this exact kind of groundbreaking research right here in the U.P.

Q : What inspired you to pursue a degree in Medicinal Plant Chemistry? What excites you most about the industry's future?

A : "I have always been curious about the natural compounds found in plants and how they can have powerful effects on the human body. Pursuing a degree in Medicinal Plant Chemistry has allowed me to combine my passion for plants with my interest in science and medicine. What excites me most about the industry's future is the growing scientific understanding of plant-derived compounds and their potential to provide new treatments for a wide variety of health conditions."

Q : What areas of Medicinal Plant Chemistry are you most passionate about and why?

A : "I am most passionate about phytochemistry and the study of plant-derived compounds. I enjoy learning about the different secondary metabolites produced by plants and how environmental stressors can influence their production. It fascinates me that these compounds can be isolated, analyzed, and potentially developed into treatments that improve human health."

Q : What are your long-term career goals within the cannabis industry?

A : "My long-term career goal within the cannabis industry is to work in research and development, studying cannabis and other medicinal plant-derived compounds and their applications for the skin and hair care industry. I hope to combine medicinal plant chemistry with cosmetic science to create safe, effective, and innovative products that promote healthy skin and hair."

Advice for future students:

"My advice to those wanting to pursue a career in the cannabis field would be to just go for it. If it is something that you are passionate about, don't let fear or uncertainty hold you back. Let your curiosity for science guide you, continue asking questions, and never stop learning. The industry is growing rapidly, and there are countless opportunities for those willing to work hard and embrace new discoveries."
